Education

Abdul Kalam Technical University

Bachelor of Technology in Computer Science (GPA: 7.9/10.0)

Sept. 2022 – Jul 2026

Uttar Pradesh, India

Technical Skills

Languages: C++, JavaScript, Python

Frameworks and libraries: React.js, Next.js 15, Prisma, Socket, React Native

Databases and Backend: Node.js, Express.js, MongoDB, Firebase, MySQL, PostgreSQL, Redis, BullMQ, Kafka

Cloud Tools: Git, GitHub, Docker, Vercel, Render, AWS EC2

Experience

INA Internet Group

Dec. 2025 - Feb. 2026

Software Development Engineer (SDE) Intern

Remote

- Collaborated with cross-functional stakeholders to design and implement scalable backend systems for a HealthTech platform.
- Designed and developed REST APIs with focus on maintainability, modularity, and secure RBAC-based access control.
- Executed slot locking and concurrency-safe booking systems, improving system reliability under concurrent usage.
- Built admin dashboards enabling data-driven decision-making, reducing manual operations by 40%.

Projects

Imagica - Scalable Image Processor [🔗](#) | *React, TypeScript, Node.js, Express, Redis, BullMQ, Docker*

Mar. 2025

- Built a scalable asynchronous image processing system using Node.js, TypeScript, and Express, handling uploads and transformations.
- Designed a distributed job pipeline using BullMQ and Redis, decoupling API and processing via background workers.
- Implemented fault-tolerant processing with retries, rate limiting, validation, and job lifecycle management (auto-cleanup with TTL).
- Developed a full-stack workflow with React, enabling real-time job status polling and dynamic file download handling.

AI Resume Roaster [🔗](#) | *React, TypeScript, Node.js, Express, OpenRouter, Tailwind CSS, Vite, PDF Parsing*

Mar. 2025

- Built an AI-powered resume analysis platform that evaluates resumes with recruiter-style feedback, ATS scoring, and improvement suggestions using LLM APIs.
- Implemented a full-stack architecture supporting PDF upload, parsing, AI evaluation, and structured JSON feedback generation.
- Created a terminal-style Matrix-themed UI to display AI roast results interactively, improving user engagement and creating a developer-focused UX.

ChitChat - Real Time Messaging [🔗](#) | *React, MongoDB, Redis, Node.js, WebSockets*

Oct. 2024

- Built a real time chat application supporting personal and group live chats.
- Secure authentication using JWT secret token and session management for seamless user sign in.
- Leveraged Redis for high-speed data storage, session handling, and caching, ensuring low-latency interactions and scalability.
- Enabled instant bidirectional updates with WebSockets (via Socket.io), delivering a smooth, real-time messaging experience.

Achievements

- **Smart India Hackathon 2024 National Finalist:** Smart India Hackathon 2024 National Finalist – Top 1% among 15,000+ teams nationwide
- Rated 1700+ on leetcode, ranking in top 10% globally by solving more than 350+ DSA problems.
- **Code Wars 2023 Winner:** Winner, Code Wars 2023 – Secured 1st place among 100+ participants
